

## POLY-GROUT PLUS™

Premium polymer-modified sanded and unsanded grout. Mixed with just water, Poly-Grout Plus™ cures to an extremely durable finish with superior color consistency combined with increased water and stain resistance. Easy cleanup formula makes removing grout haze effortless. Meets ANSI A118.6 standards.

## VERSA-TILE™ SANDED GROUT

High performance sanded Portland cement grout designed for filling joints 1/8" to 1/2".

## DRY-SET™ UNSANDED GROUT

High performance unsanded Portland cement grout designed for filling joints 1/8" or less.

## ACRYLIC GROUT ADDITIVE

Acrylic additive, which when mixed with Portland cement grout in place of water, increases grout bond to tile and substrate and improves its color uniformity and retention. Stain resistance and freeze-thaw stability are significantly enhanced.

## GROUT STAIN

Colorant and sealer for restoring or changing existing grout color. Protects grout surfaces from dirt and stains and makes subsequent cleaning easier. Available colors match all Super-Tek grout colors.

## PERFECT SEAL™ CAULK

A durable and fast curing siliconized acrylic caulking compound for a wide range of interior and exterior applications. It bonds to a variety of common surfaces including backsplashes, countertops, bathtubs, shower enclosures and vanities. Available in 11 unsanded finish colors matching Super-Tek grouts (see grout chart).
